Cuoio, Pelle e Ecopelle _ Hide leather, Soft leather and Synthetic leather _ Cuir, Cuir mince et Synthétique _ Cuero, Piel y Sintética _ Leder, Weichleder und Synthetisches Weichleder

IT - PULIZIA E MANUTENZIONE

Per la normale pulizia utilizzare solamente un panno morbido e asciutto. Eventuali macchie si possono eliminare agendo con un panno umido e utilizzando prodotti neutri. Non usare solventi (es. alcool). Solo per macchie più resistenti utilizzare prodotti specifici per la pelle facendo inizialmente una prova in una zona non visibile per verificarne l'efficacia.

Attenzione: i colori dei campionari sono indicativi e si possono riscontrare lievi tolleranze tra i campioni ed i prodotti finiti.

EN - CLEANING AND MAINTENANCE

Dust with a soft and dry cloth for the normal clearing. Any stains can be removed with a wet cloth and using delicate products. Do not use solvents (i.e. alcohol). Only for more resistant stains use specific products for the soft leather making an initially test on a not visible area to verify its effectiveness.

Warning: since the samples colors are indicative, you can find light tolerances between samples and final products.

FR - NETTOYAGE ET ENTRETIEN DU CUIR

Pour un nettoyage normal, n'utiliser qu'un chiffon doux et sec. Les éventuelles taches peuvent s'enlever à l'aide d'un tissu humide et en utilisant des produits neutres. Ne pas utiliser de solvants (par exemple alcool). Pour les taches les plus résistantes, utiliser des produits spécifiques pour le cuir en ayant auparavant fait un test sur une zone non apparente pour en vérifier l'efficacité.

Attention: les couleurs des échantillonnages ne sont qu'indicatives et des légères différences peuvent apparaître entre les échantillons et les produits finis.

ES - LIMPIEZA Y MANTENIMIENTO

Para su limpieza, utilizar un paño de algodón seco. Para otras manchas, utilizar un paño mojado y productos neutros. Nunca utilizar disolventes (por ejemplo el alcohol). Solo para manchas mas difíciles emplear productos específicos para la piel haciendo una prueba inicial sobre una zona no visible para verificar la eficacia.

Atencion: los colores del muestrario son indicativos y pueden tener muy ligeras variaciones entre la muestra y el producto finido.

DE - LEDERPFLEGE

Benutzen ein weichen und trockenen Tuch für die normale Reinigung. Stärke Flecke müssen mit einem Neutralprodukt behandelt und mit einem sauberen Tuch nachgerieben. Benutzen Sie kein Lösungsmittel (z.B. Alkohol). Nur für mehr widerstandsfähige Flecke gebrauchen spezifische Produkte für das weiche Leder, das zuerst Test auf nicht sichtbares Gebiet macht, um sein Wirksamkeit nachzuprüfen.

Achtung: Die Musterfarben sind ungefähr und es können leichte Toleranzen zwischen Musterfarben und den fertigen Waren auftreten.

Ecopelle _ Synthetic leather _ Cuir mince synthétique _ Piel Sintética _ Synthetisches Weichleder

IT - L'ecopelle è un prodotto Made in Italy e ha superato le sottoelencate prove per la resistenza alla fiamma secondo gli standard europei.

EN 1021-2/93-BS 5852-1/79-BS 5852/90 Sezione 4-crib5
UNI 9175/87 E 9175 FA-1/94 CLASSE 1.IM

EN - The synthetic leather is a Made in Italy product and it passed the here below tests concerning the fire resistance according to the European standards.

EN 1021-2/93-BS 5852-1/79-BS 5852/90 Section 4-crib5
UNI 9175/87 E 9175 FA-1/94 CLASS 1.IM

FR - Le cuir mince synthétique est un produit Made in Italy et a passé les tests de résistance au feu selon les normes européennes (ci-dessous indiqués).

EN 1021-2/93-BS 5852-1/79-BS 5852/90 Section 4-crib5
UNI 9175/87 E 9175 FA-1/94 CLASSE 1.IM

ES - La piel sintética es un producto Made in Italy que ha superado las pruebas que se enumeran a continuación de resistencia a la llamas según las normas europeas.

Tessuti idrorepellenti e antimacchia

Le moderne tecniche costruttive ci permettono di avere tessuti formati da filati con fibre finissime (dette microfibre) che intrecciate tra loro conferiscono una eccezionale robustezza. La caratteristica di Antimacchia ne deriva dal fatto che lo sporco non attecchisce al filato e può essere rimosso con la semplice smacchiatura. Il trattamento Idrorepellente non permette ai liquidi e macchie di penetrare nelle fibre mantenendo la caratteristica traspirante del tessuto e aumentandone la facilità di eliminare le macchie. Tutto ciò si traduce in massima praticità, confort e durata.

Simboli di lavaggio	
 Lavaggio a macchina alla temperatura indicata	 Non candeggiare
 Stirare a bassa temperatura (max 110°)	 Stirare a media temperatura (max 150°)
 Il prodotto tessile non sopporta l'asciugatura in tamburo	 Lavaggio a secco con tutti i solventi escluso la trielina
 Asciugatura in posizione verticale (appeso) del prodotto tessile intriso d'acqua, cioè senza spremitura e/o centrifuga	 Il prodotto tessile sopporta l'asciugatura in tamburo a temperatura ridotta

Norme di smacchiatura per tessuti idrorepellenti

Caffè, Latte, The: tamponare con carta assorbente. Quindi eliminare la macchia con panno imbevuto con acqua e sapone neutro. Se la macchia persiste strofinare con tampone imbevuto con alcool denaturato.

Inchiostro, Biro: assorbire con carta assorbente e poi trattare con panno imbevuto con trielina o alcol denaturato.

Olio e Grasso: tamponare con carta assorbente. Eliminare la macchia con tampone imbevuto con trielina o percloroetilene.

Vino e Liquore: assorbire prima con carta assorbente. Eliminare la macchia con tampone imbevuto con alcol denaturato.

Erba e Marmellata: Tamponare con acqua. Per eliminare eventuali aloni strofinare con carta assorbente e ripetere il trattamento con panno imbevuto con alcol denaturato.

Fabrics water-repellent and stain-resistant

The modern construction techniques allow us to get fabrics composed by yarns with very thin fibres (called microfibrres) giving an exceptional strength when interwoven among them. Thanks to their characteristic of stain-resistant, the dirty doesn't penetrate into the yarn and can be removed with a simple stain removing. The water-repellent treatment doesn't allow the liquids and stains to penetrate in the fibres, maintaining anyway the transpiring characteristic of the fabric and increasing the facility to remove the stains. All this means maximum practicality, comfort and duration.

Washing symbols	
 Machine washing at the indicated temperature	 Do not bleach
 Ironing at low temperature (max 110°)	 Ironing at medium temperature (max 150°)
 Do not dry by means of tumble dryer	 Dry cleaning with all solvents except for trichloroethylene
 Drying in vertical position (hanging) soaked in water, it means without squeezing and/or spin-drying	 Drying by tumble dryer at reduced temperature allowed

Rules of stain removing for water-repellent fabrics

Coffee, Milk, Tea: tampon with blotting paper. Then remove the stain using a cloth soaked in water and neutral soap. If the stain persists, scrub using a pad soaked in denatured alcohol.

Ink, Ballpoint: absorb using blotting paper and then treat using a cloth soaked in trichloroethylene or denatured alcohol.

Oil and Greasy: tampon with blotting paper. Remove the stain with a pad soaked in trichloroethylene or perchloroethylene.

Wine and Liqueur: absorb using a blotting paper. Remove the stain using a blotting pad soaked in denatured alcohol.

Grass and Jam: tampon with water. Scrub using blotting paper for removing possible halos and repeat the treatment using a cloth soaked in denatured alcohol.
